VOLUME 10

NOVEMBER, 1915-JULY, 1916

PHILADELPHIA
THE WISTAR INSTITUTE OF ANATOMY AND BIOLOGY

COMPOSED AND PRINTED AT THE
WAVERLY PRESS
By THE WILLIAMS & WILKINS COMPANY
BALTIMORE, MD., U. S. A.

CONTENTS

No. 1. NOVEMBER

JOHN LEWIS BREMER. The mesonephric corpuscles of the sheep, cow and deer. Three figures.....	1
N. WILLIAM INGALLS. Truncus arteriosus communis persistens. One figure.....	9
T. B. REEVES. A double umbilicus. Three figures.....	15
WAYNE J. ATWELL. The relation of the chorda dorsalis to the entodermal component of the hypophysis. Twelve figures.....	19
WAYNE J. ATWELL. On the conversion of a photograph into a line drawing. One figure	39
EDMOND SOUCHON. Preservation of anatomic dissections with permanent color of muscles, vessels and organs by newer methods.....	43

No. 2. DECEMBER

HENRY R. MULLER. Notes on the bursting strength of the alimentary tract of the cat. Four figures.....	53
C. J. BARTLETT. Direct union between adrenals and kidneys (subcapsular location of adrenals). Five figures.....	67
FRANKLIN P. REAGAN AND J. MONROE THORINGTON. The vascularization of the embryonic body of hybrid teleosts without circulation. Fifteen figures.....	79
FRANKLIN P. REAGAN. A further study of the origin of blood vascular tissues in chemically treated teleost embryos, with especial reference to haematopoiesis in the anterior mesenchyme and in the heart. Twenty-six figures.....	99

No. 3. JANUARY

Frontispiece. Portrait of Charles S. Minot.....	132
FREDERIC T. LEWIS. Charles Sedgwick Minot. An Address.....	133
Proceedings of the American Association of Anatomists. Thirty-second session.....	165
Proceedings of the American Association of Anatomists. Abstracts.....	171
Proceedings of the American Association of Anatomists. Demonstrations.....	265
List of officers and members.....	271

No. 4. FEBRUARY

M. R. LEWIS. Sea water as a medium for tissue cultures. Four figures.....	287
WILLIAM COGSWELL CLARKE. Experimental mesothelium. Eleven figures.....	301
GEORGE B. JENKINS. A study of the morphology of the inferior olive. Six figures.....	317
JOHN LOCKE WORCESTER. Hernia of the small intestine into a persistent great omental cavity.....	335

P. G. SHIPLEY. The development of erythrocytes from hemoglobin-free cells and the differentiation of heart muscle fibers in tissue cultivated in plasma. Two figures....	347
C. H. DANFORTH. The use of early developmental stages in the mouse for class work in embryology.....	355
C. M. JACKSON. Book Review. Rat Book.....	359

No. 5. MARCH

BENJAMIN B. LIPSHUTZ. Studies on the blood vascular tree. I. A composite study of the femoral artery. Five figures.....	361
ROLLO E. McCOTTER. Three cases of the persistence of the left superior vena cava. Three figures.....	371
CHARLES H. SPURGEON AND RALPH J. BROOKS. The implantation and early segmentation of the ovum of <i>Didelphis virginiana</i> . Fifteen figures.....	385
VERA DANCHAKOFF. Origin of the blood cells. Development of the haematopoietic organs and regeneration of the blood cells from the standpoint of the monophyletic school. One plate.....	397
VERA DANCHAKOFF. Concerning the conception of potentialities in the embryonic cells..	415
H. E. JORDAN. Evidence of hemogenic capacity of endothelium.....	417

No. 6. APRIL

H. E. JORDAN. Richard Henry Whitehead, Portrait.....	421
THEODORE L. SQUIER. On the development of the pulmonary circulation in the chick. Three text figures and two plates.....	425
P. G. SHIPLEY. The vital staining of mitochondria in <i>Trypanosoma lewisi</i> with janus green. Eight figures.....	439
S. S. SCHOCHET. A suggestion as to the process of ovulation and ovarian cyst formation..	447
MARCUS WARD LYON, JR. A porcupine skull with a pair of supernumerary well developed incisors in the upper jaw. One figure.....	459
MORRIS KUSH. Ernest Philip Boas. The carrying angle. One figure.....	463

No. 7. MAY

LEWIS H. WEED. The formation of the cranial subarachnoid spaces.....	475
VERA DANCHAKOFF. The wandering cells in the loose connective tissue of the bird and their origin.....	483
H. E. JORDAN. The microscopic structure of the leg muscle of the sea-spider, <i>Anoplodactylus lentus</i> . Seven figures.....	493
FREDERICK S. HAMMETT. The correlation of certain chemical findings with histological structure.....	509
J. R. CALLAHAN. Collateral root canals and multiple foramina in human teeth. Three figures.....	513
W. M. SMALLWOOD. A short spinal cord in the toad. Two figures.....	515

No. 8. JUNE

RAPHAEL ISAACS. Properties of colloids in relation to tissue structure.....	517
ROBERT T. HANCE. A simple paraffin ribbon winder. Two figures.	523

CONTENTS

v

SIMON H. GAGE AND BENJAMIN F. KINGSBURY. Some apparatus for the microscopical laboratory. Fifteen figures.....	527
W. B. KIRKHAM AND H. W. HAGGARD. The anatomy of a three-legged kitten. Three figures.....	537
RICHARD E. SCAMMON. On the development of the biliary system in animals lacking a gall-bladder in post-natal life. Ten figures.....	543

No. 9. JULY

ROLLO E. McCOTTER. Regarding the length and extent of the human medulla spinalis..	559
EZRA ALLEN. Studies on cell division in the albino rat (<i>Mus Norvegicus</i> , var. <i>alba</i>). one text figure and two plates.....	565
H. D. SENIOR. Reference models of the abdominal viscera. Three figures.....	591
P. G. SHIPLEY AND C. C. MACKLIN. The demonstration of centers of osteoblastic activity by use of vital dyes of the benzdene series.....	597
